## PROFILE

Software Engineer (AI Systems) with a strong background in backend architectures, microservices, and production GenAI pipelines. Skilled in building low-latency REST APIs, secure execution sandboxes, and stateful agentic workflows (LangGraph, RAG) with end-to-end deployment across cloud environments.

## EDUCATION

**Central University of Haryana** — Mahendragarh, HR
Bachelor of Technology (B.Tech.) in Computer Science and Engineering — Aug 2023 – July 2027
CGPA: 7.68/10.0

## EXPERIENCE

**Software Developer** | *BharatOne, Pune (Remote)* — July 2026 – Aug 2026

- Architected and shipped a production chat microservice using Firebase (Firestore, Auth, Cloud Functions) and Redis caching, cutting message delivery latency by 45% (to <180ms) across 2,000+ active sessions with end-to-end encryption.
- Hardened in-app conversational AI against adversarial jailbreaks, reducing prompt-injection vulnerability by 92% across a 300+ red-teaming test suite using embedding-based input/output sanitization filters.

**AI Developer Intern** | *Aigetai, Bengaluru (Hybrid)* — June 2026 – July 2026

- Engineered an enterprise RAG pipeline with semantic query routing and hybrid search (dense + BM25), increasing answer retrieval accuracy from 71% to 89% while reducing API token costs by 28%.
- Built an automated LLM-as-a-judge evaluation suite of 250+ benchmark cases in LangSmith; reduced hallucination and context misalignment from 18% to under 3% prior to enterprise deployment.

**Data Analytics Intern** | *TrendalyTix, Remote* — June 2025 – July 2025

- Worked on real-world data analytics projects covering business insights and dashboards.

**AI Trainer (Freelance)** | *Outlier, Remote* — Dec 2024 – Feb 2025

- Evaluated and calibrated 400+ multi-turn STEM and code outputs for RLHF pipelines, achieving a 98.2% reviewer acceptance rate by enforcing strict step-by-step reasoning rubrics.

## PROJECTS

**Multimodal-Guardrail** | *FastAPI, Gemini Vision, ChromaDB, OpenCV, LangSmith, Docker* — Sep 2026
`https://github.com/prvn-kumar01/Multimodal-Guardrail`

- Developed a real-time multimodal guardrail microservice using FastAPI and Gemini Vision, intercepting spatial/temporal VLM hallucinations at <420ms end-to-end latency.
- Eliminated streaming context drift and memory poisoning by designing a ChromaDB sliding-window buffer, quarantining anomalous frames with 94.6% recall across 50+ video test streams.

**Agentic Data Analyst** | *LangGraph, E2B Code Interpreter, FastAPI, Plotly, Docker, Nginx, AWS EC2* — Feb 2026
`https://github.com/prvn-kumar01/Agentic-Data-Analyst`

- Engineered a zero-human-in-the-loop LangGraph agent with stateful reflection loops, achieving an 88% first-pass execution success rate on complex multi-step tabular queries.
- Implemented secure sandboxed execution via E2B micro-VMs on AWS EC2, containing untrusted Python execution with 100% per-tenant isolation and 99.9% uptime under Nginx auto-recovery.

## TECHNICAL SKILLS

**Languages:** Python, C, C++, JavaScript, TypeScript, SQL, HTML/CSS
**GenAI & Agents:** LangGraph, LangChain, LlamaIndex, RAG/GraphRAG, Guardrails, LLM Evals
**Machine Learning:** PyTorch, TensorFlow, Scikit-learn, NLP, Pandas, NumPy
**Web Development:** React.js, React Native, Next.js, Node.js, Express.js, FastAPI, REST APIs, Tailwind CSS
**Data & Vector DBs:** PostgreSQL,Supabase, MongoDB, Pinecone, Qdrant, Weaviate, Neo4j
**Cloud & DevOps:** AWS, Docker, Kubernetes, CI/CD, Git, GitHub, Linux

## ACHIEVEMENTS & OPEN SOURCE

- **LeetCode:** Solved 170+ algorithmic problems demonstrating strong core data structures and problem-solving skills (`leetcode.com/u/praveenn18`).
- **National Finalist, 5G Lab Innovation Hackathon (2025):** AR smart glasses on 5G URLLC; 1000 teams, INR 1,00,000 funding.
- **Open Source Contributor,** GirlScript Summer of Code (GSSoC).
