Shubh Patel

Jabalpur, MP
+91-9165725720 — shubhpatel915@gmail.com — linkedin.com/in/shubh-patel-79305b2b7 — github.com/shubh9165 — leetcode.com/u/shubh_9165

EDUCATION

Baderia Global Institute of Engineering and Management Jabalpur **2023 – 2027**
B.Tech - Computer Science and Engineering - ***CGPA - 7.5*** *Jabalpur, Madhya Pradesh*

EXPERIENCE

Zophrix **Oct 2026 – Present**
AI/ML Intern *Remote*

- Contributing to full-stack development of AI-powered product features, integrating AI capabilities with backend services and application workflows.
- Working on AI integration using LLM APIs and Python-based backend services to support intelligent application features.
- Working with Google Cloud Platform (GCP) as part of the cloud-based application development and deployment workflow.

PROBLEM SOLVING & CODING

LeetCode: shubh_9165 – 600+ Problems Solved, 365-Day Max Streak, 365-Day Badge, 2x 200-Day Badges, 2x 100-Day Badges, 3x 50-Day Badges, 5x Monthly Badges

LeetCode Contest: Shubh_patel9 – 1600+ Contest Rating, Regular Contest Participant

Contest Achievement: Secured **Top 1,500** rank among participants in LeetCode Weekly Contest 520

GeeksforGeeks: shubhpac4xcc – 100+ Problems Solved in Data Structures & Algorithms

TECHNICAL SKILLS

Programming: Python, Java, SQL

AI/ML & GenAI: Machine Learning, Deep Learning, LLMs, Generative AI, RAG, Agentic AI, Prompt Engineering, LangChain, LangGraph, FAISS, Vector Databases

Backend: FastAPI, REST APIs, Pydantic, SQLAlchemy, Alembic, JWT, Authentication & Authorization, Async Programming

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Database Design, Normalization, Indexing, Transactions

Cloud & MLOps: AWS (S3, EC2, ECR, IAM), Docker, MLflow, DVC, GitHub Actions, CI/CD

CS Fundamentals: Operating Systems, DBMS, OOP, Computer Networks

Frameworks & Libraries: Scikit-learn, TensorFlow, Keras, NumPy, Pandas, Matplotlib, Seaborn, Streamlit

PROJECTS

FraudShield | Live | GitHub | MLOps, Scikit-learn, FastAPI, Docker, AWS(S3,EC2,ECR), MongoDB Atlas

- Engineered a production-grade MLOps pipeline covering full ML lifecycle — data ingestion, validation, transformation, training, and evaluation
- Implemented model versioning using AWS S3 as model registry and deployed containerized app on AWS EC2 via Docker AWS ECR

Nova AI Interviewer | Live | GitHub | Python, LangGraph,, Faster-Whisper, Streamlit, HuggingFace Spaces

- Built Nova-AI-Interviewer, a voice-based AI mock interviewer powered by a multi-agent LangGraph system for interview question generation and candidate evaluation feedback).
- Integrated Faster-Whisper for low-latency speech-to-text transcription and Groq-hosted LLMs for sub-second inference, enabling natural, real-time conversational interviews.
