ABOUT ME

Computer Science graduate (2026) specializing in AI automation and AI agents. Built four end-to-end projects with n8n, Gemini, Stripe, Google Calendar and Supabase, including a RAG-based chatbot with payment and booking automation. Strong foundation in OOP, data structures, SQL and web development (PHP, HTML, CSS, JavaScript). Seeking an entry-level software or AI automation role, on-site in Multan or remote.

TECHNICAL SKILLS

Programming & Fundamentals: Python, PHP, JavaScript, Object-Oriented Programming (OOP), Data Structures & Algorithms

Web Development: HTML, CSS, JavaScript, PHP

Databases: SQL, Supabase (vector store)

AI & Automation: n8n, AI Agents, Multi-Agent Systems, Retrieval-Augmented Generation (RAG), Prompt Engineering, Gemini API, LangChain (Python)

Integrations: Stripe (Checkout & Webhooks), Google Calendar, Gmail, Google Sheets, REST APIs, JSON

Machine Learning: ML concepts; currently learning Deep Learning

Tools: Cursor, Postman, Docker, Zapier, Make.com

PROJECTS

Travel Agency AI Chatbot (RAG + Stripe) *n8n, Gemini, Supabase, Stripe*

- Built an AI chatbot that answers tour questions (price, duration, available dates) from a Supabase knowledge base and says clearly when information is not available.
- Collects booking details, asks for confirmation and creates a Stripe payment link; after payment, saves the booking in Supabase.
- Sends confirmation emails to both the customer and the owner. Tested end to end in Stripe Test Mode.
- **GitHub:** github.com/asma-ashraf/travel-agency-ai-chatbot

Appointment Automation (Stripe + n8n) *n8n, Stripe, Google Calendar, Gmail*

- Built a booking workflow: customers submit a form (name, email, date, time) and receive a Stripe payment link by email.
- A Stripe webhook triggers after payment, creates a Google Calendar event at the booked time and emails confirmations to the customer and owner.
- **GitHub:** github.com/asma-ashraf/appointment-automation-stripe-n8n

Customer Support Multi-Agent System *n8n, Gemini, Google Sheets*

- Built a multi-agent support system: a main AI agent receives questions through a webhook and calls a second AI agent as a tool.
- Both agents read data from Google Sheets to give accurate answers.

AI Lead Qualifier *n8n, Gemini, Google Sheets*

- Built a workflow that receives leads via webhook, extracts key details, routes them with a Switch node, processes them with an AI agent and saves results in Google Sheets.

EDUCATION

Bachelor of Science in Computer Science (BSCS) 2026
Women University Multan
